Experience

Frontend Developer & Co-founder - Aftercode Software

Mar 2024 - Sep 2026

- Co-founded a software company and delivered client-facing products, internal tools, and automation workflows, translating business requirements into maintainable web applications.
- Designed and developed Bildenlex's frontend architecture, supporting the daily operational workflows of 5-10 users.
- Built frontend and integration workflows for Legali/LexFlow, including validated forms and document generation, plus a Tango-integrated quoting hub for Mi Casa Decoraciones.

Frontend Developer (Contract) - Nerdconf

Oct 2021 - Jan 2026

- Built websites, interactive games, and digital experiences with React, WordPress, and 3D web technologies for in-person events with 400+ attendees.
- Developed a human-bingo experience for a live event, translating event mechanics into an interactive web product used by attendees.

Software Developer - Corpora

Jan 2022 - Jul 2023

- Owned the end-to-end creation of the original Bildenlex system as the sole developer, from product definition and architecture through implementation.
- Delivered custom web applications, document automation, reporting, and internal tools for clients.
